
SKILLS & TECHNOLOGIES

- Python, SQL, AWS, Kubernetes, Docker, Shell Scripting, FastAPI, Pandas, Poetry, Flask, PostgreSQL
 - Linux/Unix Machines, RDBMS DBs, Github, ETL, JIRA/SNOW, Confluence, PyTest, RESTful APIs, Databricks
-

WORK EXPERIENCE

Python Developer **DMI** **11/2024 - 11/2025**

- Designed and maintained server-side business logic, REST APIs, and data models for a modular SaaS platform.
- Developed CRUD services, complex ETL pipelines, and integrated FastAPI/Django endpoints.
- Architected and deployed new microservices system from the ground up.
- Created database schemas and migrations, optimizing data relationships and query performance.
- Designed and deployed microservices and infrastructure from scratch using Docker and Kubernetes.
- Implemented role-based authentication and authorization logic.
- Established backend testing strategy and authored comprehensive unit/integration tests.
- Enhanced error handling, logging, and telemetry to improve visibility and debugging.
- Built internal CI pipelines and deployment workflows for a multi-tenant SaaS platform.
- Ensured backend fault tolerance by incorporating retries, rollback hooks, and circuit breakers.
- Collaborated with product and design to finalize API contracts and deliverables.

Support Engineer **Pure Storage** **07/2022 - 11/2023**

- Developed Python-based internal tools using Pandas and NumPy, reducing data processing time by 40%.
- Designed a suite of tools for Linux log file analysis from flat files, streamlining technical support processes.
- Utilized AWS services (IAM, S3, Lambda) for scalable cloud-based applications, achieving a 20% improvement in scalability.
- Investigated and resolved tool-related issues, contributing to a 30% reduction in crashes.
- Created system-level performance scripts to optimize backend job flows.
- Automated backend service recovery tasks using AWS IAM policies and validation hooks.
- Implemented Identity and Access Management (IAM) solutions, resulting in a 15% reduction in unauthorized access incidents.
- Implemented data validation SQL scripts, reducing data inconsistencies by 10% in production environments.

SQL Developer **ActOne - JP Morgan Chase** **04/2021 - 02/2022**

- Developed three microservices with event-driven design, handling API interactions and JSON parsing.
- Designed and maintained Docker, Kubernetes, Jenkins, and Git solutions for microservices deployment.
- Automated data transfer from relational databases using an object-relational mapper (ORM).
- Integrated Kafka pipelines for async event processing and monitoring.
- Experience with continuous integration and automation using JENKINS & Used JIRA for tracking and Updating Project issues.
- Automated dependency packaging and registry handling using Poetry and Nexus.

HVR Application Engineer **AGR LLC - GE Aviation** **11/2018 - 07/2020**

Evolved into HVR SME after two months on the job which led to assisting teams while fulfilling my duties on the platform team. Supporting operations and development team. Lead Platform team for 6 months.

- Developed and deployed Python scripts to automate HVR (High Volume Replication) decreasing teams' workload by 30%.
 - Coded and distributed Python automation scripts to RedHat/Ubuntu/Solaris systems to handle HVR errors completing 40% of Operations team daily workload.
 - Performed SQL queries on Oracle and Postgres databases to aid in DevOps operations
 - Introduced and pushed automation of 24/7 monitoring: decreasing Platform team's workload by 10%.
 - Automated platform deployments and error recovery logic using shell scripting and Python.
 - Architected scalable AWS solutions using Lambda, S3, DynamoDB, Glue, and Step Functions, resulting in a 35% increase in data processing speeds.
 - Monitored and maintained ETL processes with AWS CloudWatch, Talend, and HVR, proactively addressing issues to minimize downtime.
 - Wrote ETL monitoring tools and scheduled maintenance routines on RedHat/Ubuntu/Solaris.
-

EDUCATION

University of Cincinnati **Bachelor of Computer Science** **08/2013 to 05/2018**

- Dean's List
- Drumline/Marching Band (5 years)
